

# CORD KING®

"Proven the Worlds fastest mobile firewood processor"

Cord King is the pioneer company that started building Firewood Processors back in 1978 and was the first Firewood Processor manufacturer to use circular saw technology to cut firewood. Cord King has prides itself in manufacturing the world's finest, most productive machines available in the world today. We have processors in 9 different countries worldwide.

The 18 way hydraulic adjustable packaged firewood wedge is the newest splitter in the Cord King lineup as seen below on the CS2740 processor. This wedge has the power and capacity to catapult a packaged firewood producer over the top of its competition. The ability to hydraulically adjust the height of the wedge minimizes scrap. Check it out on [www.youtube.com/user/cordwoodking](http://www.youtube.com/user/cordwoodking)

## CORD KING CS2740 (Model 60)

"Simply the best"

Cord King's flagship machine is the CS2740 (Model 60)

### Performance:

- ✓ Production Rate: Up to 9 full cords per hour. Cycle time of 4 seconds cut to cut.
- ✓ Log capacity is 27" maximum diameter x up to 60\* ft long (\*with an extended infeed)
- ✓ 60 inch diameter carbide tipped slasher saw that delivers 1500 cords between sharpening
- ✓ Splitting force from 42 ton (standard) to the 58 ton or even 72 ton (both optional)
- ✓ Splitter system comes standard with a 10 or 12 way fixed wedge and available with up to an 18 way hydraulic adjustable packaging wedge. Kindling wedges are also available.
- ✓ Feed System: an endless WR78 chain system with 3" high dogs provide trouble free log feeding even with the most challenging wood.
- ✓ Best warranty in the business: Lifetime splitter warranty (as long as you own the machine) and 2 year engine warranty along with a 1 year bumper to bumper warranty.

### Specifications:

- ✓ Engine of your choice with 140 hp diesel tier III. Our preference is John Deere or CAT.
- ✓ Fuel consumption and volume: 2.5 gallons per hr. with 30 gallon fuel tank
- ✓ Hydraulic Oil Reservoir is 130 gallons
- ✓ Hydraulic Oil Cooler capacity: 48000 BTU per hr. (Has auto on/off)
- ✓ Machine weight: 14,000 lbs with tandem axel and electric brakes.
- ✓ Pintle hitch towing with 102" machine width and 28' machine length.
- ✓ 44 carbide teeth that are easily interchangeable and sharpenable on the machine.

**Options:** Many options are available. Please call our office for details.

The photo above is a good illustration of the typical user friendly control panel on all Cord King Models. The complete cutting and splitting cycle can be performed using only two control levers. Automation using "Autosplit" is also available.

To the left is a photo of a 16 way fixed packaging wedge. This wedge produces split wood 3"x 3" and ready for bundling. This splitter requires a 58 ton ram upgrade on the CS2740.

A complete line of offloading conveyors and debris conveyors are available from 12' to 50' long. A Grizzly Debris Separator can also be fitted to help remove any debris from the pile or truck (seen at the top end of the conveyor above). Typical conveyors lift with a manual winching system however hydraulic lifts are also available for a marginal cost.
